Thank you for purchasing the Monoprice 600750 Singer / Songwriter Microphone Kit. With proper care, these mics will provide many years of satisfaction. For best results, please take a few moments to review this literature.

## General Characteristics

The Monoprice 600750 Singer / Songwriter Microphone Kit includes two condenser microphones. Condenser microphones are very sensitive, readily revealing very subtle sonic details. They also tend to pick up sounds outside the pattern more than some designs, which can lead to powerful feedback if you are not careful. We strongly advise experimentation with placement and isolation requirements with the gain initially set low to avoid equipment (and ear) damage.

## Power Requirements

**IMPORTANT** - This unit requires phantom power at 48 volts,  $\pm 4$  volts. Each unit has been thoroughly checked before shipping, so if you hear no sound, check that the phantom power on your mixer or separate power supply is switched on! This microphone will not operate without supplying this external power.

## Microphone Cables

These microphones connect to a mixer or preamp via XLR cable (not included). The microphone cable can have a profound effect on the sound of any microphone. Even the finest microphones will sound poor if the interconnect cable allows noise to enter, or causes distortion and loss of information. Use only the best microphone cable your budget will allow.

## Care

Dust and foreign material can degrade the performance of a microphone over time so always store the unit in its case. Remove fingerprints from the exterior with a damp soft cloth. Clean the gold contacts occasionally with a de-oxidant/cleaner.
