VGA to HDMI converter
Incorporate HDMI® technology

I. Introduction
This device converts the VGA video and L/R analog audio output from a PC into 1080p HDMI, suitable for use on an HDTV. It supports input resolutions up to 1920x1080@60Hz and is compatible with a wide range of PCs and HDTVs.

II. Supported Input VGA Resolutions
- 720x400@85Hz
- 800x600@60Hz
- 1280x720@60Hz
- 1280x1024@60Hz
- 1600x1200@60Hz
- 640x480@60Hz
- 1024x768@60Hz
- 1280x768@60Hz
- 1360x768@60Hz

III. Device Connections

1. VGA input
2. 3.5mm stereo audio input
3. Power and Signal LEDs
4. HDMI output
5. DC 5V power supply input

IV. Specifications
- Input Power: 5V DC/1A
- Input Connections: 1x DE-15 (HD-15) VGA, 1x 3.5mm stereo audio
- Output Connections: 1x HDMI
- Impedance: 75 ohms
- HDMI Transmission Rate: 5Gbps

V. Included in the Box
- 1x VGA + stereo audio to HDMI converter
- 1x 5VDC/1A power adapter
- 1x User manual

VI. Connection

VII. Troubleshooting
1. The green LEDs indicate when power is applied and when a signal is detected.
2. If the LEDs are lit and there is no display, try using a shorter and/or larger gauge HDMI cable.
3. Ensure that the input video resolutions are one of those listed in section II.
