

**Important:** Read Template before Installing

Line up Center of Left Stud mark here. >

16"  
Installation for 2 x 4 studs  
on 16 inch center ONLY.

**Figure A**

Place Template  
on center of  
left stud line

Final size of cut out will be 7.125" H x 7.687" W

**Step #3**

After taping the template onto the wall, find holes A, B, C, and D on the template.

Using a push pin, mark the A, B, C, and D hole locations on the wall by piercing into the template and the drywall.

**Step #4**

Remove the template from the wall. Using a straightedge, mark the wall with a pen or pencil to connect the four (4) holes on the wall.

Use a drywall saw or utility knife to cut along the lines marked on the wall. Before installing this plate, return to figure 3 of the instruction sheet.

**Step #1**

Determine the location on your wall where you will install the expandable media box. Now, use a studfinder to locate the center of the left stud. Mark the center location of the left stud on the drywall.

Find **Figure A** to the far left of this template before proceeding.

**Step #2**

Line up your left stud center mark with Figure A. Be sure your paper template is level and tape it onto the wall.

**Read Instruction Sheet completely before using this template.**

Template for Expandable Media Box  
P/N 45-0052-WH
