SAFETY WARNINGS AND GUIDELINES

Please read this entire manual before using this device, paying extra attention to these safety warnings and guidelines. Please keep this manual in a safe place for future reference.

- This device is intended for indoor use only.
- Do not expose this device to water or moisture of any kind. Do not place drinks or other containers with moisture on or near the device. If moisture does get in or on the device, immediately unplug it from the power outlet and allow it to fully dry before reapplying power.
- Do not touch the device, the power cord, or any other connected cables with wet hands.
- This device uses a grounded power cord and requires a ground connection for safe operation. Ensure that the power source has a proper ground connection. Do not modify the plug or use a "cheater" plug to bypass the ground connection.
- Do not expose this device to excessively high temperatures. Do not place it in, on, or near heat sources, such as a fireplace, stove, radiator, etc. Do not leave it in direct sunlight.
- This device ventilates excessive heat through the slots and openings in the case. Do not block or cover these openings. Ensure that the device is in an open area where it can get sufficient airflow to keep from overheating.
- Prior to operation, check the unit and power cord for physical damage. Do not use if physical damage has occurred.
- Take care to prevent damage to the power cord. Do not allow it to become crimped, pinched, walked on, or become tangled with other cords. Ensure that the power cord does not present a tripping hazard.
- Never unplug the unit by pulling on the power cord. Always grasp the connector head or adapter body.
- Ensure that power is turned off and disconnected before making any electrical connections.

- Clean using a soft, dry cloth only. Do not use chemical cleaners, solvents, or detergents. For stubborn deposits, moisten the cloth with warm water.
- This device has no user serviceable parts. Do not attempt to open, service, or modify this device.

INTRODUCTION

Thank you for purchasing this Unity 450-Watt Bridgeable Power Amp! This 2-channel class D power amplifier features a stereo speaker output, with support for 4-ohm and 8-ohm speakers. It can deliver 150 watts per channel into 8-ohm loads or 225 watts per channel into 4-ohm loads. Additionally, the output can be bridged to provide 450 watts to a single 8-ohm speaker.

FEATURES

- Class-D amplifier providing 150 watts/channel (RMS) into 8 ohm loads or 225 watts/channel into 4-ohm loads
- Bridgeable output provides 450 watts into a single 8-ohm load
- 4-pole detachable speaker screw connector (Phoenix connector) with support for up to 12 AWG speaker wire
- Built-in thermal and short circuit protection circuits
- Includes rack-mount ears

CUSTOMER SERVICE

The Monoprice™ Customer Service department is dedicated to ensuring that your ordering, purchasing, and delivery experience is second to none. If you have any problem with your order, please give us an opportunity to make it right. You can contact a Monoprice Customer Service representative through the Live Chat link on our website www.monoprice.com or via email at support@monoprice.com. Check the website for support times and links.

PACKAGE CONTENTS

Please take an inventory of the package contents to ensure you have all the items listed below. If anything is missing or damaged, please contact Monoprice Customer Service for a replacement.

- 1x 450-watt stereo power amplifier
- 1x AC power cord (NEMA 5-15 to IEC 60320 C13)
- 2x Short rack-mount ears
- 1x Long rack-mount ear
- 1x Bridge plate
- 6x Button head screws
- 4x Countersunk screws
- 4x Rubber feet
- 1x User's manual

PRODUCT OVERVIEW

Front Panel

1. **POWER:** Press the switch to turn the amplifier on or off.
2. **STATUS:** The LED illuminates green during normal operation or red when in standby mode. Note that after 5 minutes with no audio input, the amplifier will automatically go into standby mode.
3. **VOLUME:** Turn the knob to increase or decrease the volume level.

Rear Panel

1. **INPUT:** 3.5mm TRS and stereo RCA inputs. Note that if both inputs are used, the two inputs will be mixed.
2. **MODE:** Use the switch to set the amplifier for stereo or bridged mono operation.
3. **SPEAKER:** Phoenix connector for connecting one or two speakers.
4. **AC VOLTAGE SELECTOR:** Use the switch to select 115 or 230 VAC power input.
5. **AC IN:** Grounded AC power input connector.

THERMAL PROTECTION

The amplifier monitors its temperature and will activate the thermal protection circuit if the temperature exceeds a safe limit. This can occur if the amp has been operated at high volumes for an extended period of time, if it has inadequate ventilation, or if the speaker load is below the minimum impedance of 4 ohms. The amp will shut down when the Thermal Protection circuit engages. You must turn off the amp's power switch and wait until the amp cools down, then power the amp back on.

SHORT CIRCUIT PROTECTION

If the amplifier detects a short circuit on one or both speaker outputs, the output will be disabled. If this occurs, turn off the amplifier and check the speakers and speaker wires for a short circuit.

MOUNTING OPTIONS

This amplifier can be placed stand-alone on a flat surface, such as a table or shelf, or can be installed into a standard 19" equipment rack, either by itself or side-by-side with a second Unity power amp.

Stand-Alone Setup

To use the amplifier in a stand-alone installation, locate the included sheet with four rubber feet. Peel each rubber foot from the sheet and attach them to the bottom of the amp at each of the four corners. This will both protect your mounting surface from scratches and will prevent any incidental noise from vibration.

Single Rack-Mount Setup

Perform the following steps to install a single amplifier into a 19" equipment rack.

1. Using three of the button head screws, attach one short rack-mount ear to one side of the amplifier, with the flat side flush with the front panel.
2. Using the remaining three button head screws, attach the long rack-mount ear to the other side of the amplifier, with the long flat side flush with the front panel. It does not matter which side of the amp has the short rack-mount ear and which side has the long one.
3. Using rack-mount screws (not included), secure the two rack-mount ears to the rack mount.

Dual Rack-Mount Setup

Perform the following steps to install two amplifiers side-by-side into a 19" equipment rack.

1. Turn the amplifiers over and place them side by side.
2. Place the bridge plate over the junction of the two amps with the beveled holes visible, then attach it to the two amps using the four countersunk screws.
3. Turn the amps over so they are right-side up, then attach one short rack-mount ear to the exposed side of each amp using three button head screws.

4. Using rack-mount screws (not included), secure the two rack-mount ears to the rack mount.

STEREO INSTALLATION

1. Ensure that all equipment to be connected is powered off and unplugged from its power source prior to making any electrical or audio connections.
2. Place or mount the amplifier in its intended location.
3. Using a 1/8" flat head screwdriver, loosen the four screws on the **SPEAKER** Phoenix connector to open the speaker wire clamps.
4. Using a two-conductor speaker wire (not included), insert the negative lead into the **L- connector**, then tighten the screw to lock it in place. Give the wire a gentle tug to ensure it is securely attached to the connector. Repeat for the positive lead and the **L+ connector**.
5. Connect the negative lead of the speaker wire to the negative input on your left channel speaker, then connect to the positive lead to the positive input.
6. Using a second two-conductor speaker wire, repeat steps 4 and 5 for the **R- and R+ connectors**, and the right channel speaker.
7. Using a stereo RCA cable (not included), plug the left and right plugs into the **L and R connectors** on the **INPUT**, then plug the other end into the analog stereo outputs

on your preamplifier, television, or other audio source device. Alternatively, using a 3.5mm TRS audio cable, plug one end into the 3.5mm **INPUT**, then plug the other end into the stereo output of your audio source device (e.g., smartphone). Note that if both inputs are used, the two inputs will be mixed.

8. Turn the **VOLUME** knob fully counterclockwise to the minimum position.
9. Ensure that the **POWER** switch is in the **OFF** position.
10. Ensure that the **MODE** switch is in the **STEREO** position.
11. Ensure that the **AC INPUT SELECTOR** switch is set to the position that most closely matches the AC power level in your area.
12. Plug the C13 connector on the included AC power cord into the C14 **AC IN** connector, then plug the other end into a nearby AC power outlet. The **STATUS** LED will illuminate red to indicate that the amplifier is in standby mode.
13. Depress the **POWER** switch to turn the amplifier **ON**. The **STATUS** LED will change from red to green.
14. Plug in and power on your audio source device, then start audio playback.
15. Slowly turn the **VOLUME** control clockwise until the volume is at a comfortable level. Enjoy!

MONO BRIDGED INSTALLATION

Rather than driving two 8-ohm or 4-ohm speakers in stereo mode, the amplifier can be configured to bridge the two channels to provide 450 watts of power into a single 8-ohm load. *Note that only 8-ohm loads can be used when using Mono Bridged mode.*

1. Ensure that all equipment to be connected is powered off and unplugged from its power source prior to making any electrical or audio connections.
2. Place or mount the amplifier in its intended location.
3. Using a 1/8" flat head screwdriver, loosen the **R-** and **L+** screws on the **SPEAKER** Phoenix connector to open the speaker wire clamps.
4. Using a two-conductor speaker wire (not included), insert the negative lead into the **R- connector**, then tighten the screw to lock it in place. Give the wire a gentle tug to ensure it is securely attached to the connector. Repeat for the positive lead and the **L+ connector**.
5. Connect the negative lead of the speaker wire to the negative input on your speaker, then connect to the positive lead to the positive input.
6. Using a single conductor RCA cable (not included), plug one end into the **L connector** on the **INPUT** connector, then plug the other end into one of the analog stereo outputs on your preamplifier, television, or other audio source device. Alternatively, using a 3.5mm TRS audio cable, plug one end into the 3.5mm **INPUT** connector. Note that if both inputs are used, the two inputs will be mixed.
7. Turn the **VOLUME** knob fully counterclockwise to the minimum position.
8. Ensure that the **POWER** switch is in the **OFF** position.
9. Ensure that the **MODE** switch is in the **BRIDGE MONO** position.
10. Ensure that the **AC INPUT SELECTOR** switch is set to the position that most closely matches the AC power level in your area.
11. Plug the C13 connector on the included AC power cord into the C14 **AC IN** connector, then plug the other end into a nearby AC power outlet. The **STATUS LED** will illuminate red to indicate that the amplifier is in standby mode.

12. Press the **POWER** switch to turn the amplifier **ON**. The **STATUS** LED will change from red to green.
13. Plug in and power on your audio source device, then start audio playback.
14. Slowly turn the **VOLUME** knob clockwise until the volume level is at a comfortable level.

TECHNICAL SUPPORT

Monoprice™ is pleased to provide free, live, online technical support to assist you with any questions you may have about installation, setup, troubleshooting, or product recommendations. If you ever need assistance with your new product, please come online to talk to one of our friendly and knowledgeable Tech Support Associates. Technical support is available through the online chat button on our website **www.monoprice.com** or through email by sending a message to **tech@monoprice.com**. Check the website for support times and links.

SPECIFICATIONS

Model	31027
Audio Inputs	Stereo analog RCA and 3.5mm TRS line inputs
Output Power	150 watts/channel into 8 ohms or 225 watts/channel into 4 ohms or 450 watts into a single 8-ohm load
Minimum Output Impedance	4 ohms in stereo mode 8 ohms in mono bridged mode
Total Harmonic Distortion	< 1% @ 150 watts into 8 ohms
Signal-to-Noise Ratio	> 90dB(A)
Frequency Response	20Hz ~ 20kHz +0/-2dB @ 8 ohms
Input Sensitivity	700mV
Protection Circuits	Thermal and short circuit
Input Power	115 or 230 VAC, 50/60 Hz
Dimensions	8.4" x 9.8" x 1.7" (214 x 250 x 44 mm)
Weight	3.6 lbs. (1.65 kg)

REGULATORY COMPLIANCE

Notice for FCC

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Modifying the equipment without Monoprice's authorization may result in the equipment no longer complying with FCC requirements for Class B digital devices. In that event, your right to use the equipment may be limited by FCC regulations, and you may be required to correct any interference to radio or television communications at your own expense.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Notice for Industry Canada

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
