

Package Contents

1x IP Control Box
1x Standard Rack Mount Kit
1x Power Cord
4x Footpads
1x User Manual

Notice for FCC

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Modifying the equipment without Monoprice's authorization may result in the equipment no longer complying with FCC requirements for Class B digital devices. In that event, your right to use the equipment may be limited by FCC regulations, and you may be required to correct any interference to radio or television communications at your own expense. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Notice for ISED Canada

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Quick Start Guide

Blackbird™ by Monoprice™ 4 Outlet Control Box For Remote Hard Reset of Equipment

A Hardware Review

C Hardware Installation

B Mounting

D Securing the Cables

For added safety, use lock cable holders (not included) to secure the cables to your attached devices in place on the unit. Refer to Hardware installation on Step 2.
NOTE: Cable holders and installation tools are optional and not included.

A Hardware Review

- 1 LAN Port
- 2 Reset Button (recessed)
- 3 Sensor Port & LED
- 4 Door Sensor Dry-Contact Port
- 5 Power Control Buttons & LEDs

- 6 Device Power LED
- 7 Grounding Terminal
- 8 Power Outlet Sockets
- 9 Circuit Breaker
- 10 Power Inlet Socket

B Mounting

Desktop Mount

If you wish to keep your unit on a desktop, attach the supplied footpads and place the unit on any appropriate level surface that can safely support its weight, plus the weight of its attached cables.

Rack Mount

- 1 Decide where you will rack mount the unit and choose where you would attach the rack mount ear (position 1, 2, 3, or 4). As an example, we will choose to attach the rack mount ear shown above (position 3).
- 2 Align and stabilize the rack mount ear using M3 Philips Hex Screws.

- 3 Align the unit and rack mount ear to the rack and stabilize using rack screws.
- 4 Let the buttons stabilize in the button holes and the mounting is complete.

C Hardware Installation

- 1 Make sure the unit is properly grounded.
NOTE: Do not omit this step. Proper grounding helps to prevent damage to the unit from power surges or static electricity.
- 2 For each device you want to connect, plug its power cable to any available outlet on the unit.
- 3 Connect an internet-enabled LAN cable into the unit's LAN port.
- 4 (Optional) If you are to use an environmental sensor in your installation, connect it to the RJ-11 sensor port.
- 5 (Optional) If you are to use a door sensor in your installation, connect it to the Door Sensor Dry-Contact Port.
- 6 Connect the unit to an AC power source.
- 7 Power on the connected devices.
