|   | X6 | X1 | X2 | S=4mm |    |    |

Tools required not included

1

When handling and carrying the desktop workstation, make sure to always have one person lift with both hands on each side to balance out the weight.

Warning: Moving parts may cause damage and/or injury if not handled properly.

2

Flip the desktop workstation over carefully.

Attach the extended feet (B) to the base using the screws (C).

3

Press the handles on each side at the same time and raise the desk frame.

4

7

Attach cable tie (E) to desk to manage keyboard and mouse cables

5

Mount the keyboard tray to the desk using the screws (D).

8

Manage the cables of your devices using the cable zip ties (F).

6

Place your devices and peripherals on the fully-mounted desktop workstation.

Keep all your devices and their parts on top of the workstation at all times. Allowing them to hang off the edge of the desktop workstation may result in damage and/or injury.

Raise the desk frame slowly. Raising it too fast may create instability to your devices, resulting to damage and/or injury.

Leave enough slack when tying the cables to allow for the full range of the workstation's vertical motion (15" / 38 cm). Failure to follow this warning may result in damage and/or injury.

To avoid the pinching of your cables, follow the cable routing instructions in this user guide. Failure to follow these instructions may result in damage and/or injury.

**! WARNING**

**PINCH POINT**

DO NOT place hands on and/or near the support bars and in between the frames. Pinch points are created during lifting and raising the desk frame. Failure to follow this instruction may result in damage and/or injury.
