Stage Right™ - Truss 1 Meter, Truss 1.5 Meter,
Truss 2 Meter, Truss Corner, Truss Base

- Read the entire instruction manual before you start installation and assembly. If you have any questions regarding any of the instructions or warnings, please contact Monoprice Technical Support for assistance.**
- Failure to use this truss in accordance with this manual may result in equipment damage, personal injury, or death.
 - This product should only be assembled by persons with an understanding of the weight limitations of this truss.
 - Frequent inspections of all truss system parts should include checking for signs of wear, deformations, and/or cracks in the welds and frame.
 - This truss is intended for indoor use only.
 - Simple arch structures should not extend above a height of 10 feet (3 meters).
 - This truss system is only recommended for a maximum 13 foot (4 meter) span in any dimension. No single span should exceed 13 feet.
 - This truss is NOT recommended for hanging speaker systems.
 - All bolts in a span of truss must face the same direction. Truss uprights need to have the bolts on top with nuts on the bottom.
 - When you are tightening the bolts, always wrench down with your ratchet from the nut side and only turn a few cranks past firm.
 - If you overtighten the bolts you risk damaging or breaking them.
 - Only hang equipment from main tubes, never from the smaller inner tubes.
 - Only use O-clamps and C-clamps rated for 1.5 inches (38mm) tubes.
 - Always use safety cables when attaching equipment to a truss.
