

Stage Right™ by Monoprice™

18x 10-Watt RGBW 4-in-1 LED Flat Par Stage Light

Brilliant, Customizable Lighting for Every Event and Performance

The Stage Right™ by Monoprice™ 18x 10-Watt RGBW 4-in-1 LED Flat Par Stage Light is a versatile, high-performance lighting solution designed for professional and event use. Whether you're a DJ, live performer, or event planner, this flat par stage light delivers brilliant and customizable uplighting that enhances any atmosphere. Ideal for concerts, weddings, banquets, and other live events, it features 18 powerful 10-watt Red/Green/Blue/White (RGBW) LEDs that provide superior color blending and dazzling light shows.

With its quad-color technology, this LED flat par uplighting offers a broad spectrum of vibrant colors and smooth transitions, making it perfect for stage and ambient event lighting. The unit supports DMX control with 4 or 8 channel options, as well as master/slave, auto, and sound-activated modes. These features provide users full control over their lighting effects. You can easily sync the lights to music or other audio cues, creating dynamic and mood-enhancing displays that captivate any audience.

Designed for flexibility and ease of use, the Stage Right™ LED Flat Par Stage Light works as a standalone unit or can be integrated into larger DMX lighting setups. 40° beam angle offers ideal and wide coverage for everything from intimate gatherings to larger venues. Its energy-efficient design ensures low power consumption, while the 50,000-hour lamp life provides long-lasting and reliable performance.

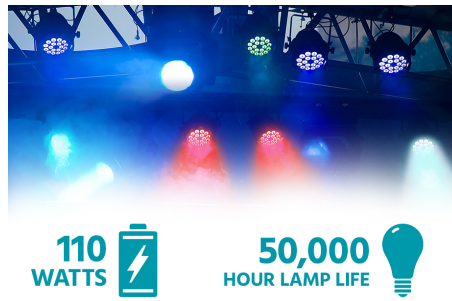

Weighing just 5.5 pounds, this stage light is lightweight and portable for easy transport and set up. Whether you're setting the stage for a band, lighting a wedding venue, or running a DJ show, this LED par light combines high output, long life, and versatility, making it an essential tool for professional lighting setups.

- Equipped with 18x 10-watt RGBW 4-in-1 LEDs for vibrant and precise color mixing
- Supports both 4 and 8 DMX channel modes for flexible control options
- Offers master/slave, auto, and sound-activated modes for easy, customizable lighting effects
- Features a 40° beam angle for wide, even light coverage across any venue
- Energy-efficient with 110-watt power consumption and a long 50,000-hour lamp life
- Compact and portable design, weighing only 5.5 pounds for easy transport and setup
- Ideal for use in professional stage lighting, concerts, weddings, and other events
- Built-in programs allow it to function as a standalone unit, no additional equipment needed

FLEXIBLE CONTROL OPTIONS FOR SEAMLESS INTEGRATION

Whether you're running a complex lighting rig or a simple setup, the 4 and 8 DMX channel modes allow for easy customization, giving you full control over your lighting effects to match the mood or event requirements.

ENERGY EFFICIENT WITH LONG-LASTING PERFORMANCE

With only 110 watts of power consumption and an impressive 50,000-hour lamp life, this stage light offers cost-effective operation and long-lasting reliability, minimizing maintenance and replacement needs.

PORTABLE AND EASY TO SET UP

Lightweight at just 5.5 pounds and featuring built-in programs for auto and sound-activated modes, this LED flat par light is quick and easy to install, making it ideal for mobile performers, DJs, and event planners on the go.
