

Monoprice™

Cat6a Blue Patch Cable Available in .5ft - 30ft

26AWG, 10G, Bare Copper Conductor, Gold Plated Copper Connector, RJ45, Non-Booted Ethernet Cable

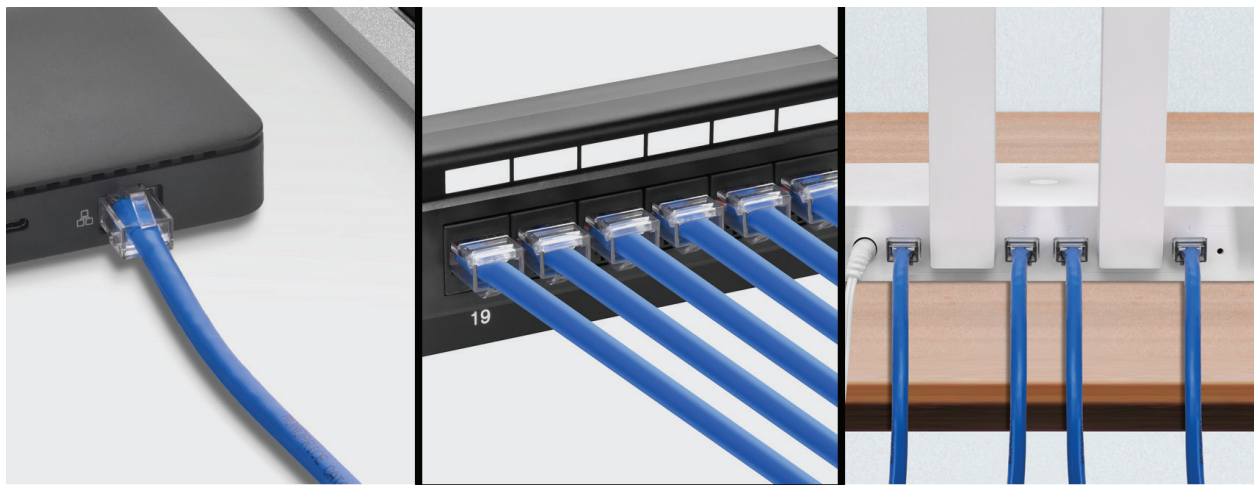

Introducing our Monoprice Non-Booted Category 6A Ethernet Cable, meticulously engineered to meet the demands of modern high-density networking environments. This high-performance cable is the epitome of efficiency and reliability, making it an indispensable component for businesses and tech enthusiasts alike who seek uncompromised network performance.

The Monoprice Non-Booted design of our Ethernet cable is a game-changer for high-density environments. By eliminating the boot, the cable takes up significantly less space, allowing for a cleaner, more organized setup. This feature is particularly beneficial for data centers, server rooms, and other installations where space optimization is crucial. With our Monoprice Non-Booted Ethernet cable, you can achieve a neat and efficient layout without sacrificing performance.

Experience seamless connectivity with our 50µm gold plated contacts. Gold plating ensures superior corrosion resistance and enhances signal quality by minimizing interference and data loss. This results in a stable and reliable network connection, essential for applications requiring high-speed data transmission and low latency, such as video streaming, online gaming, and large file transfers.

Safety and reliability are at the forefront of our design philosophy. Our Category 6A Ethernet cable is UL certified, ensuring it meets stringent safety and performance standards. This certification provides peace of mind, knowing that your network infrastructure is built with components that adhere to industry-leading safety protocols.

- Shielded Twisted Pair (STP) Category 6A Ethernet cable
- 26AWG stranded, pure bare copper conductors
- 500MHz bandwidth
- Non-Booted – Takes up less space in a high-density environment
- 50µm gold plated contacts
- UL certified

100% PURE BARE COPPER WIRE

Monoprice™ Ethernet cables are made of 100% pure bare copper wire, as opposed to copper clad aluminum (CCA) wire, and are therefore fully compliant with UL® Code 444 and National Electrical Code® TIA-568-C.2 fire and safety standards, which require pure bare copper wire in communications cables.

Blue	Black
45396 (0.5ft), 45397 (1ft), 45398 (2ft), 45399 (3ft), 45400 (5ft), 45401 (7ft), 45402 (10ft), 45403 (14ft), 45404 (15ft), 45405 (20ft), 45406 (25ft), 45407 (30ft), 45408 (50ft), 45409 (75ft), 45410 (100ft),	45423 (0.5ft), 45424 (1ft), 45425 (2ft), 45426 (3ft), 45427 (5ft), 45428 (7ft), 45429 (10ft), 45430 (14ft), 45431 (15ft), 45432(20ft), 45433 (25ft), 45434 (30ft), 45435 (50ft), 45436 (75ft), 45437 (100ft)
Networking Cable	Cat6a
Gauge	26AWG
Connector	RJ45
In-Wall Rating	CM
Conductor Material	Pure Bare Copper
Transfer Rate	10Gb
Packaging	Polybag
