

Monoprice™

Cat6A Unshielded RJ45 Connectors with Break-Resistant Latch & Strain Relief Boot – Gold-Plated, for 23–26AWG UTP Cable, 50 Sets

Create Professional Patch Leads with Secure Termination and Durable Clip Protection

Build clean, reliable Cat6A network cable terminations with these Monoprice Cat6A Unshielded RJ45 Connectors with matching strain relief boots. Designed for 23–26AWG UTP (Unshielded Twisted Pair) cable, these connectors help installers create custom Ethernet patch cables with a secure fit, dependable contact, and added latch protection for everyday networking applications.

The break-resistant latch helps reduce snagging and damage during installation and cable management, while the matching strain relief boots support the cable at the connector for a cleaner, more professional finish.

Featuring 50μ gold-plated contacts for consistent conductivity and corrosion resistance, this convenient 50-set jar includes 50 plugs and 50 boots. It provides a practical solution for structured cabling, IT installations, and network maintenance where organization, durability, and easy identification matter.

- Designed for terminating Cat6A unshielded Ethernet cables for reliable custom network cable builds
- Compatible with 23–26AWG UTP cable, making it suitable for a wide range of structured cabling applications
- Includes a break-resistant latch to help reduce snagging and protect connectors during installation and cable routing
- Comes with matching strain relief boots to support the cable at the connector and provide a cleaner, more finished look
- Features gold-plated contacts for dependable conductivity and enhanced corrosion resistance
- Ideal for custom patch cable assembly, network maintenance, IT installations, and organized cabling projects
- Packed in a convenient 50-set jar that includes 50 plugs and 50 boots for efficient storage, handling, and jobsite use
- Available in multiple colors to support cable identification and installation organization

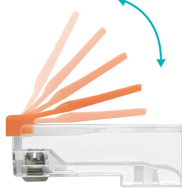

RELIABLE CAT6A CABLE TERMINATION

Designed for 23–26AWG UTP cable, these Cat6A unshielded RJ45 connectors help create dependable custom Ethernet cable terminations for structured cabling, patch cable builds, and network maintenance. The connector design supports proper fitment for compatible cable sizes, helping installers achieve clean, consistent results.

Bend-Resistant Nylon Latch

Min. 5000 Bending Cycles

ADDED PROTECTION DURING INSTALLATION

The break-resistant latch helps reduce damage during cable routing, installation, and repeated handling. By protecting the locking tab from snagging and stress, it helps improve durability in active installation environments where connector retention matters.

CLEANER, MORE SECURE FINISHED CABLES

Each set includes a matching strain relief boot that helps support the cable at the back of the connector while delivering a more finished, professional look. This added support helps reduce stress at the termination point and improves overall cable management.

Full Specs

P/N	49259, 49260, 49261, 49262, 49263, 49264, 49372, 49373
Product Type	RJ45 Connector with Strain Relief Boot
Category	Cat6A
Connector Type	RJ45 Modular Plug
Shielding	Unshielded Twisted Pair (UTP)
Cable Compatibility	23–26 AWG UTP Cable
Contact Plating	Gold-Plated
Latch Type	Break-Resistant Latch
Boot Type	Strain Relief Boot
Quantity	50 Plugs + 50 Strain Relief Boots
Packaging	Storage Jar
Color	Red, Green, Blue, Yellow, Gray, White, Orange, Purple
Compliance	RoHS Compliant

PACKAGE CONTENTS

50x Cat6A Unshielded RJ45
Connectors with Break-Resistant
Latch
50x Strain Relief Boots
1x Storage Jar
