

Monoprice™

Commercial Series Floor to Ceiling Wire Mount System for Back to Back Landscape Displays, Fits 32" to 65" TVs

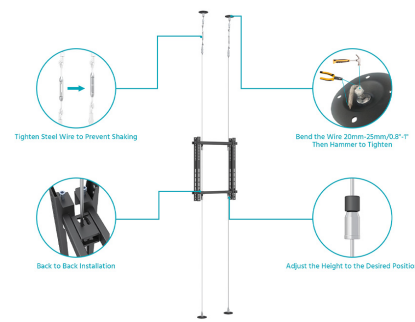

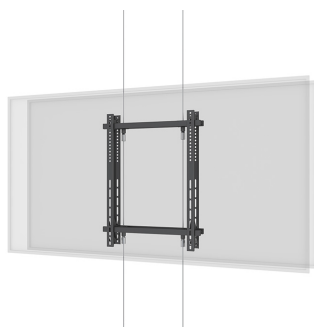

The Monoprice Commercial Series Floor to Ceiling Wire Mount System for Back to Back Landscape Displays is engineered for two sided digital signage in open commercial environments. Using a tensioned wire design, this system securely mounts two landscape oriented displays back to back between the floor and ceiling—creating a clean, modern presentation visible from both sides.

Designed for professional AV installations, this mount supports displays from 32" to 65" per screen, making it ideal for retail signage, menus, wayfinding, and informational displays in high traffic indoor spaces where wall mounting is not an option.

BACK TO BACK LANDSCAPE DISPLAY CONFIGURATION

Supports two flat panel displays mounted back to back, allowing content to be viewed from opposite directions—perfect for open floor plans, aisles, and glass fronted spaces.

FLOOR TO CEILING WIRE MOUNT ARCHITECTURE

A tensioned steel wire system anchors securely between the floor and ceiling, delivering a “floating” look without walls while maintaining commercial grade stability.

DESIGNED FOR LANDSCAPE DISPLAYS

Optimized for landscape orientation, making it ideal for widescreen content such as menus, dashboards, promotions, schedules, and digital signage.

ADJUSTABLE MOUNTING HEIGHT

The wire based system allows installers to set display height within the available floor to ceiling span, adapting easily to different room layouts and viewing distances.
