

Monoprice™

## Commercial Series Suspended Wire Back to Back Ceiling Mount for Window Shopping, Fits 43" to 65" TVs

The Monoprice Commercial Series Suspended Wire Back to Back Ceiling Mount for Window Shopping is designed for dual sided, high visibility signage where content must be viewed from both sides of a storefront or window. Using a suspended wire ceiling system, this mount supports two portrait oriented displays mounted back to back, creating a clean, floating presentation ideal for retail windows, malls, and showrooms.

Engineered for professional AV installations, it supports displays from 43" to 65" per screen while maintaining a minimal visual footprint and commercial grade reliability.

### BACK TO BACK DISPLAY CONFIGURATION

Supports two flat panel displays mounted back to back, allowing content to be visible from inside and outside a storefront or from opposite directions in open retail environments.

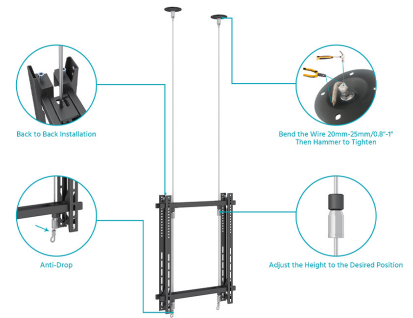

## OPTIMIZED FOR WINDOW SHOPPING APPLICATIONS

The suspended wire design minimizes structural bulk, keeping the viewer's focus on the content while preserving sightlines to merchandise and interiors behind the display.

## PORTRAIT ORIENTATION FOR VERTICAL SIGNAGE

Designed specifically for portrait mode displays, making it ideal for digital posters, promotions, menus, and advertising commonly used in window facing signage.

## SUSPENDED WIRE CEILING MOUNT SYSTEM

High strength steel suspension wires support the dual display assembly from the ceiling, creating a modern, architectural "floating" appearance suitable for premium retail spaces.
