

Monoprice™

USB-C to 3.5mm Mic and 3.5mm Stereo Audio — Gaming Headset to PC Adapter

Gaming headsets with two separate 3.5mm plugs — one for audio out, one for microphone — are the standard for PC gaming, but USB-C-only laptops and modern desktops leave those headsets without a direct connection. The Monoprice USB-C to 3.5mm Mic and 3.5mm Stereo Audio Adapter solves this with a single USB-C plug that splits into a dedicated 3.5mm headphone output and a separate 3.5mm microphone input. Both aluminum shells are laser-engraved with function icons — a headphone symbol and a microphone symbol — so you never have to guess which plug is which.

The 125 mm nylon-braided cable adds durability without bulk, with a PVC core at 2.7 mm OD and a nylon braid at 3.2 mm OD. Nickel-plated contacts on all three connectors ensure a reliable, corrosion-resistant connection.

- Dual 3.5mm ports. One USB-C plug delivers a dedicated headphone output and a separate microphone input — no shared combo jack.
- Labeled aluminum shells. Laser-engraved headphone and microphone icons on each port mean you always connect to the right jack.
- Compact 125 mm cable. Short enough to sit flush behind a workstation or fold flat in a laptop bag without excess slack.
- Nylon-braided construction. 3.2 mm braid OD over a 2.7 mm PVC core; resists tangling and daily handling wear.
- Nickel-plated connectors. All three ports — USB-C, headphone 3.5mm, and microphone 3.5mm — use nickel plating for corrosion resistance.
- USB-C audio output required. This adapter requires the host USB-C port to support audio output. Verify device specs; not compatible with charging-only USB-C ports.

DUAL 3.5MM PORTS

One USB-C plug delivers a dedicated headphone output and a separate microphone input — separate jacks, separate signals.

LABELED ALUMINUM SHELLS

Laser-engraved headphone and mic icons mark each port permanently; CNC aluminum construction.

125 MM NYLON-BRAIDED CABLE

3.2 mm braid OD over a 2.7 mm PVC core; compact enough for a laptop bag.

Full Specs

Connector type A	USB-C male
Connector type B	3.5mm female earphone (audio output)
Connector type C	3.5mm female microphone (audio input)
Cable length	125 (±5) mm
Cable OD, PVC jacket	2.7 mm
Cable OD, nylon braid	3.2 mm
Wire construction	30/0.05+1/0.12 copper foil+200DES×0.7TPEE×3C
Shell material	Aluminum
Color	Gray
Country of origin	China
FCC compliance	Part 15 Subpart B

PACKAGE CONTENTS

- 1x Monoprice USB-C to 3.5mm Mic and 3.5mm Stereo Audio Adapter
